

§ 7001. DEFINITIONS

In this chapter:

(1) "Commission" means the Public Utility Commission under section 3 of this title.

(2) "Company" means any public utility <u>company_which</u>, <u>municipality</u>, or <u>person that</u> supplies gas, electricity, <u>hot water</u>, <u>steam</u>, or telecommunications service and <u>which that</u> maintains underground utility facilities, and any cable television company operating a cable television system as defined in section 501 of this title and_which that maintains underground utility facilities.

(3) "Damage" includes the substantial weakening of structural or lateral support of an underground utility facility_{$\overline{12}$} penetration or destruction of any

underground utility facility's protective coating, housing, or device_{$\overline{2}$} or the partial or complete severance of any underground utility facility.

(4) "Excavation activities" means <u>any</u> activities <u>involving that will</u> <u>disturb the subsurface of the earth or could damage underground utility</u> <u>facilities and that may involve</u> the removal of earth, rock, or other materials in the ground, <u>disturbing the subsurface of the earth</u>, or the demolition of any structure, by the discharge of explosives or the use of powered or mechanized equipment, including digging, trenching, blasting, boring, drilling, hammering, post driving, wrecking, razing, or tunneling, <u>or pavement or concrete slab</u> <u>removal</u> within 100 feet of an underground utility facility. Excavation activities shall not include the tilling of the soil for agricultural purposes, routine home gardening with hand tools outside easement areas and public rights-of-way, activities relating to routine public highway maintenance, or the use of hand tools by a company, or the company's agent or a contractor working under the agent's direction, to locate or service the company's facilities, provided the company has a written damage prevention program.

(5) "Person" means any individual, trust, firm, joint stock company, corporation including a government corporation, partnership, association, state, municipality, commission, political subdivision of the state State, or any interstate body.

(6) "Public agency" means the State or any political subdivision thereof, including any governmental agency.

(7) "Approximate location of underground utility facilities" means a strip of land extending not more than 18 inches on either side of the underground utility facilities.

(8) "System" means the public utility underground facility damage prevention system referred to in section 7002 of this title.

(9) "Underground utility facility" or "facility" means any pipe, conduit, wire, or cable located beneath the surface of the earth and maintained by a company, including the protective covering of the pipe, conduit, wire, or cable, as well as any manhole, vault, or pedestal, or component maintained by a company.

(10) "Premark" means to identify the general scope of excavation activities using white paint, stakes, or other suitable white markings, in a manner that will enable the operators of the underground utility facilities to know the boundaries of the proposed excavation activities. (11) "Powered or mechanized equipment" means equipment that is powered or energized by any motor, engine, or hydraulic or pneumatic device and that is used for excavation or demolition work.

(12) "Hand tools" means tools powered solely by human energy.

(13) "Verified" means the location and depth have been physically determined by hand digging visually determined using careful and prudent excavating techniques such as hand digging, water excavation, or other safe means.

(14) "Damage prevention program" means a program established to ensure employees involved in excavation activities are aware of and utilize appropriate and safe excavating practices.

Sec. 10. 30 V.S.A. § 7003 is amended to read:

§ 7003. RULEMAKING

The Commission shall adopt rules, pursuant to 3 V.S.A. chapter 25 relative to:

(1) minimum requirements for the operation of the System, including notification procedures and the reporting of underground utility facility locations;

(2) procedures for the investigation of complaints;

(3) emergency situations for which notice of excavation activities is not required;

(4) uniform standards for the marking of the approximate location of underground utility facilities;

(5) uniform standards for the future installation of underground utility facilities, including the following:

(A) color coding of facilities;

(B) depth requirements for the laying of facilities;

(C) subsurface marking of facilities;

(D) surface marking of facilities;

(E) the filing of as-built plans of facilities with municipalities; and

(F) capability for location of facilities by sensors-;

(6) standards for the granting of exemptions under section 7002 of this title; and

(7) situations where the premarks cannot be found.

Sec. 11. 30 V.S.A. § 7004 is amended to read:

§ 7004. NOTICE OF EXCAVATION ACTIVITIES

(a) No person or company shall engage in excavation activities, except in an emergency situation as defined by the Commission, without premarking the proposed area of excavation activities and giving notice as required by this section.

(b) Prior to notifying the System, the person shall premark the area of proposed excavation activities in a manner that will enable operators of underground facilities to identify the boundaries of the proposed excavation activities.

(c) At least 48 hours, excluding Saturdays, Sundays, and legal holidays, but not more than 30 days before commencing excavation activities, each person required to give notice of excavation activities shall notify the System referred to in section 7002 of this title. Such notice shall set forth a reasonably accurate and readily identifiable description of the geographical location of the proposed excavation activities and the premarks.

(c)(d) Notice to the System may be in writing or by telephone. For purposes of this section, the System shall provide a toll-free telephone number.

(d) Prior to notifying the System, the person must premark the area of proposed excavation activities in a manner that will enable operators of underground facilities to identify the boundaries of the proposed excavation activities. Premarking is not required if the actual excavation will be continuous and will exceed 500 feet in length.

(e) Notice of excavation activities shall be valid for an excavation site until one of the following occurs:

(1) the excavation is not completed within 30 days of the notification;

(2) the markings become faded, illegible, or destroyed; or

(3) the company installs new underground facilities in a marked area still under excavation.

Sec. 12. 30 V.S.A. § 7006b is amended to read:

§ 7006b. EXCAVATION AREA PRECAUTIONS

Any person engaged in excavating activities in the approximate location of underground utility facilities marked pursuant to section 7006 of this title shall take reasonable precautions to avoid damage to underground utility facilities, including any substantial weakening of the structural or lateral support of such facilities or penetration, severance, or destruction of such facilities. When excavation activities involve horizontal or directional boring, the <u>The</u> person engaged in excavation activities shall expose underground facilities to verify their location and depth, in a safe manner, at each location where the work will cross a facility and at reasonable intervals when paralleling an underground facility. Powered or mechanized equipment may only be used within the approximate location where the facilities have been verified.

Sec. 13. 30 V.S.A. § 7007 is amended to read:

§ 7007. NOTICE OF DAMAGE

When any underground utility facility is damaged during excavation activities, the excavator shall immediately notify the affected company. Under no circumstances shall the excavator backfill or conceal the damaged area until the company inspects and repairs the damage, provided that the excavator shall take reasonable and prudent actions to protect the public from serious injury from the damaged facilities until the company or emergency response personnel arrive at the damaged area. <u>An excavator who causes damage to a</u> pipeline that results in a release of natural or other gas or hazardous liquid shall promptly report the release to emergency responders by calling 911.

Sec. 14. 30 V.S.A. § 209(e) is amended to read:

(e) Thermal energy and process fuel efficiency funding.

(1) Each of the following shall be used to deliver thermal energy and process fuel energy efficiency services in accordance with this section for unregulated fuels to Vermont consumers of such fuels. In addition, the Commission may authorize an entity appointed to deliver such services under subdivision (d)(2)(B) of this section to use monies subject to this subsection for the <u>engineering</u>, design, and construction of facilities for the conversion of thermal energy customers using fossil fuels to district heat if the majority of the district's energy is from biomass sources, the district's distribution system is highly energy efficient, and such conversion is cost effective.
